To

All Channel Partners (New Entrepreneurs) /SNAs/ PSUs/Other Implementing Agencies

Sub: Geo-tagging of Grid Connected Solar Rooftop projects

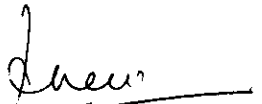

As part of our green climate commitments, Government of India has setup an ambitious target of installing 100 GW of Solar Power by 2022, including 40GW of grid connected rooftop solar(RTS). RTS sector has tremendous potential for generating decentralized and distributed solar power by utilizing the rooftop and vacant areas of industrial, commercial, residential, institutional, social and public buildings.

2. Given the importance of the target, progress of the project is being directly monitored by Prime Minister's Office (PMO). In order to scrupulous monitoring, Geotagging of all renewable energy projects and resources is to be ensured. For this geotagging of already executed projects and new projects is necessary. In this regard, necessary steps have to be undertaken for rooftop solar projects (rooftop and vacant land) as follows.

(a) Subsidized Category: SNAs/PSUs and other implementing agencies are hereby directed to regularly update details of commissioned projects in SPIN portal of MNRE with additional details such as Latitude-Longitude of site and photographs of the project. SNAs should coordinate with Channel partners (including new entrepreneurs) to avoid duplicity in entering data.

(b) Non-subsidized Category: Channel Partners (including new entrepreneurs) must update on SPIN complete details of all projects commissioned by them till date under non-subsidized category by 30.10.2016. The performance of the Channel Partners (including new entrepreneurs), as reflected by the commissioned projects in SPIN, will be considered for renewal of Channel Partner certificate and also for upgradation of New Entrepreneurs to Channel Partners. Any request in this regard will not be entertained thereafter.

Yours Sincerely

(Veena Sinha)

Director
